PART 1 GENERAL

1.1 Purpose

The purpose of this Rule is to provide clarity on the District's enforcement authority for the National Emission Standards for Hazardous Air Pollutants by incorporating those provisions of Parts 61 and 63, Chapter I, Title 40 of the Code of Federal Regulations (40 CFR Parts 61 & 63) into this Rule by reference.

**MONTEREY BAY UNIFIED AIR POLLUTION CONTROL DISTRICT
REGULATION IV
PROHIBITIONS**

1.2 Applicability

All new stationary sources of air pollution, and all modified or reconstructed stationary sources of air pollution shall comply with the standards, criteria, and requirements set forth herein. Whenever any source is subject to more than one rule, regulation, provision or requirement relating to the control of any air contaminant, the most stringent provision shall apply.

1.3 Exemptions

As noted in each subpart's applicability section.

1.4 Effective Dates

This Rule as most recently revised is effective on November 19, 2008.

1.5 References

The authority for this Rule arises from the provisions of California Health and Safety Code Sections 40001 and 40702.

PART 2 DEFINITION

For the purpose of this Rule, the definition below shall apply.

2.1 Administrator

The word "Administrator" as used in 40 CFR Parts 61 and 63 shall mean the Air Pollution Control Officer (APCO) of the District, except where the reference to "Administrator" relates to approval of alternate or equivalent test methods or alternative work practices.

- The definition of "Visible Emissions" at § 61.141 is clarified to include emissions from any source, whether a point source or an area source.
- The Standard for Roadways at §61.143 is revised to add: "No person shall cause or allow the deposition of any asbestos material upon any public roadway as a result of any transport or hauling activity."
- "Thoroughly Inspect" as required in §61.145(a) is clarified as follows: All suspect building materials, in each building, that will be disturbed by planned demolition or renovation activities shall be sampled and analyzed for asbestos using the method specified in Appendix E, Subpart E, 40 Code of Federal Regulations, Part 763, Section 1 (Polarized Light Microscopy) or assumed to be asbestos containing. Suspect materials include, friable asbestos-containing material, Category I nonfriable asbestos-containing material, Category II nonfriable asbestos-containing material or any other material that may contain asbestos based on past manufacturing practices or use.
- The Standard for waste disposal for asbestos mills at §61.151 is revised to include incineration among the activities from which visible emissions are prohibited.
- Building surveys shall clearly identify all suspect building materials, sample locations and the laboratory analysis for each sample taken in a written report. The written building survey report shall be submitted along with the notification for each demolition project and for asbestos removal projects that will disturb building materials other than those being abated.
